

CT-323

Line Set Cover Cutting Tool

OPERATION

Unlock hook on handle to release grip and open the cutting blade. CAUTION: Blade will quickly snap open.

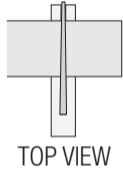

Position the duct inside the corresponding slots and cut by ratcheting the handles slowly several times.

DUCT POSITIONING

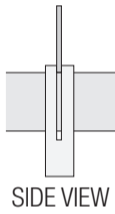

Push the duct into the slot. Cut cover and base of the ducts separately.

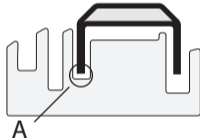

Tips for cleanly cutting the duct:

Insert the duct at a 90° angle to the blade.

Hold the duct straight.

Reduce the cutting motion when blade reaches position A.

CAUTION

1. Always wear eye protection.
2. Keep hand and fingers away from moving parts and the sharp blade.
3. Do not use the tool if the blade is dull or broken.
4. Cut only designated duct sizes.
5. Plastic ducts may crack at low temperatures; heat the duct with hot air and cut with caution.
6. Avoid dropping the tool, as it could damage the blade and body.
7. Keep the tool out of reach of children.
8. Everwell® or its affiliates shall not be liable for any injuries or accidents caused by misuse or abuse of this product, unauthorized modifications or alterations of this product, or failure to properly follow this instruction manual.

DANGER

Do not use near live electrical circuits.

WARNING

Safety glasses and gloves must always be worn when using this tool. Keep your hand and fingers away from sharp blades.
