

TD-10

LCD Digital Thermometer For Internal Panel

OPERATION INSTRUCTION

Features

- LCD display
- Insert design
- Modern design
- Two coin type batteries for extended use
- Especially applied in refrigerator, chiller, deep freeze, etc

Technical parameter

- Temperature range: -50°C to 70°C
- Using environment:
 - Temperature: -5°C to 50°C
 - Humidity: 5% to 80%
- Accuracy: $\pm 1^{\circ}\text{C}$ (-30°C to 40°C)
- Resolution: 1 ($\leq -20^{\circ}\text{C}$) 0.1 ($> -20^{\circ}\text{C}$)
- Power: Battery operated (LR44, 1.5V)

Instruction

- Open the battery cover to install two LR44 batteries. Please note correct polarity.
- Display when put in the batteries. remove the batteries when not use.
- LCD display $^{\circ}\text{C}$ when temperature is higher than 70°C ;
LCD display $^{\circ}\text{F}$ when temperature is lower than -50°C .
- Insert size: $46.2 \times 26.7\text{mm}$
