

TD-30

LCD Digital Thermometer For Internal Panel

OPERATION INSTRUCTION

Features

- LCD display
- Insert design
- Modern design - Durable ABS plastic
- One coin type LR44 battery for extended use
- Especially designed for refrigerators, chillers, deep freezers, etc
- Wired probe cable length 1.49m

Technical Parameter

- Temperature range: -50°C to 70°C
- Working environment:
 - Temperature: -5°C to 50°C
 - Humidity: 5% to 80%
- Temperature accuracy: $\pm 1^{\circ}\text{C}$ (-30°C to 40°C)
- Resolution: 1 ($\leq -20^{\circ}\text{C}$) 0.1 ($> -20^{\circ}\text{C}$)
- Power: Battery operated (LR44, DC 1.5V)
- Celsius only

Instruction

- Open the front battery cover to install two LR44 batteries. Please note correct polarity
- Display when put in the batteries. Remove the batteries when not use
- LCD display $^{\circ}\text{C}$ when temperature is higher than 70°C
- LCD display $^{\circ}\text{F}$ when temperature is lower than -50°C
- Insert size: 59.5×25mm
